1 Welcome

Welcome to the riteSCAN Plugin Guide. This document provides the information that will help you configure riteSCAN to use custom plugins.

2 Plugins Overview

Plugins for riteSCAN allow for custom functionality to be delivered without needing a custom executable.

Custom plugins are distributed by riteSOFT as zipped .dll files.

Important Note: In some cases, when the .dll files are acquired through an email attachment or downloaded from a web portal, Windows may "block" the files. They will need to be unblocked before copying them to the Plugin directory noted below. Simply right click the .dll file and choose Properties, then click Unblock and OK. See image below.

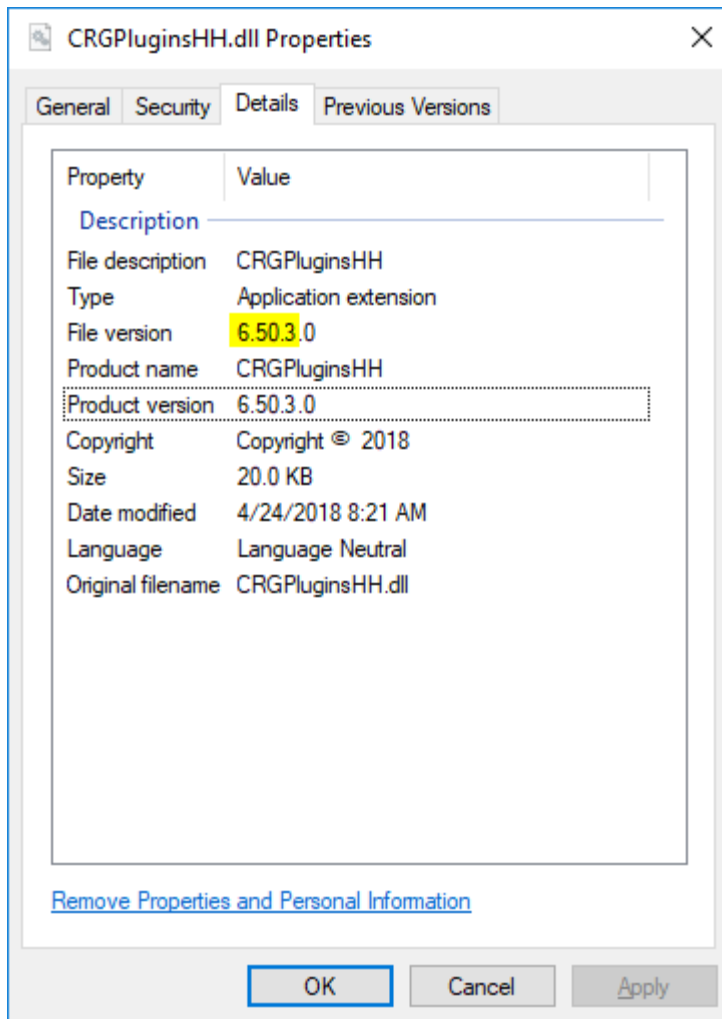

Note: In some Operating Systems, the Unblock checkbox will be a Button.

3 Plugin Version Compatibility

Plugins are compatible only with a matching riteSCAN version. Compatibility is determined by the first three segments of the riteSCAN version and the Plugin version matching. The fourth segment does not impact compatibility.

The Plugin version can be found by right clicking the .dll file and choosing Properties, then clicking on the Details tab. In the example below, the first three segments are "6.50.3".

The riteSCAN version can be found on the login screen. In the example below, the first three segments are "6.50.3".

4 Installing a Plugin

NOTE: If the “Plugins” directories mentioned below do not exist, please create them.

Depending on the type of Plugin that you purchased, you may have plugin files for Windows Client, Web Service (Server component), Windows Mobile, Windows CE, or Android devices.

The table below shows the Platform, associated Filename and the directory location for where to place the file.

Important Note: If your plugin has a server side component, you also need to edit this file “C:\Program Files (x86)\riteSOFT\riteSCAN Web Service\App_Data\WebServiceSettings.xml” with a text editor, then set: <Plugins>true</Plugins>

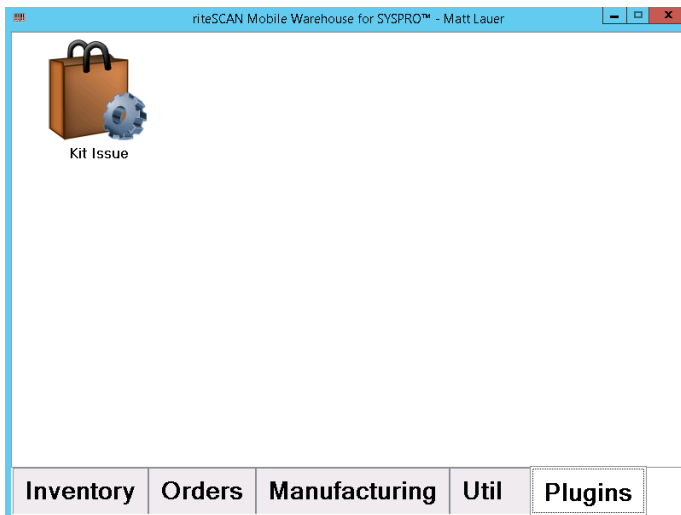

Platform	Filename	File Location
Web Service (Server)	[CompanyName]ServerPlugin.dll	C:\Program Files (x86)\riteSOFT\riteSCAN Web Service\App_Data\Plugins\
Windows Client	[CompanyName]ClientPlugin.dll	C:\Program Files (x86)\riteSOFT\riteSCAN Windows Client\Plugins\

Windows Mobile 5	[CompanyName]ClientPluginHH5.dll	\Program Files\riteSOFT\riteSCAN Handheld Client 5\Plugins\
Windows Mobile 6.5	[CompanyName]ClientPluginHH65.dll	\Program Files\riteSOFT\riteSCAN Handheld Client 6.5\Plugins\
Windows CE 5	[CompanyName]ClientPluginCE.dll	\Program Files\riteSOFT\riteSCAN Handheld Client\Plugins\
Windows CE 6 or 7	[CompanyName]ClientPluginCE6.dll	\Program Files\riteSOFT\riteSCAN Handheld Client\Plugins\
Android	[CompanyName].Android.apk	You do not need to place this file, just run the apk installer as you would any other apk.

5 Using a Plugin

Plugins only work with the version for which they were created. If you upgrade your version of riteSCAN, you must also upgrade your plugin.

To run the plugin, click the Plugins tab on the bottom of the screen and then click the plugin you wish to run.

6 Custom Settings

Plugins can use custom user settings (similar to those set in the Administration Application and used in other riteSCAN modules). These settings allow for the Plugin to be customized for individual users. The custom settings will be located in a configuration file with a Globally Unique Identifier (GUID) as the file name. The configuration file will be generated the first time a user logs in with the plugin loaded.

7 Additional Help and Support

If you need additional assistance, we are here to help! Visit our support portal or contact our support team.

- Product Downloads, Documentation, Knowledge Base, and How-To Articles are available at <https://ritesoft.freshdesk.com/support/home>
- Email our support team at ritescan@ritesoft.com or call us at 1-320-252-6830, ext. 885 or 1-866-580-7483.
